About

I have 8 years of experience in developing beautiful interactive web and mobile software solutions. In the last few years working at the iHub UX Lab and iHub Consulting has gifted me with great interest and experience in UX design by participating in design thinking sessions, design sprints and UX Design and Prototyping. I have excellent problem solving skills and I am also very tech savvy and I always strain to keep myself at the top of the software development industry and modern technologies and design methodologies. I have a great ability of working productively under high pressure, short deliverable cycles and with minimum supervision.

Experience

iHub Limited

April 2014 - Present

Frontend Developer

🔗 <https://ihub.co.ke>

At iHub I started working with the iHub UX Lab which is the first User Experience Lab in Kenya where I got to learn how to integrate User Experience in my Software Development Projects. At iHub I have been tasked with the following:
